1. This application contains claims directed to the following patentably distinct species:

1) Group I: Claims 1-3 and 27.

2) Group II: Claims 4-6.

3) Group III: Claim 7.

4) Group IV: Claims 15-16.

5) Group V: Claims 17-20.

2. The species are independent or distinct because:

Group I (particularly claim 1) discloses that the non-contact type memory device disposed in a reel of at least one of the upper and lower flanges of the tape reel.

Group II (particularly claim 4) discloses that the non-contact type memory device disposed on a surface facing to a tape winding surface of the cartridge body and wherein the memory device has an antenna for transmitting and receiving data.

Group III (particularly claim 7) discloses that the non-contact type memory device provided in a recessed portion formed in at least one of the bottom surface of the lower half and an upper surface of the slider.

Group IV (particularly claims 15 and 16) discloses that a "cartridge memory" (do not need a non-contact type) provided inside which records information on the recording medium cartridge and information on data recorded on the recording medium, wherein a part of at least one of the upper and lower halves that corresponds to the cartridge memory, is notched. The cartridge memory is disposed in a position facing to a space

Art Unit: 2652

between two pieces of windings of a magnetic tape defined as a recording medium (claim 16).

Group V (particularly claims 17 and 18) discloses that a cartridge memory (do not disclose a "non-contact" type) which records information on the recording medium cartridge and information on data recorded on the recording medium (claim 17), wherein the cartridge memory is welded together with a recording medium detecting device (claim 18).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 2652

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen T. Cao whose telephone number is (571) 272-7569. The examiner can normally be reached on Mon - Thurs (7:30 - 6:00).

Art Unit: 2652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
